

# **TriMet Safety**

## **A Five-Year Overview**

**Board Briefing**  
**October 28, 2015**

# Background

- **Fatal bus collision in April 2010 prompted a top-to-bottom safety review**
  - Independent safety review
  - Creation of Taskforce on Safety and Service Excellence
- **General Manager charge**

***“How to migrate TriMet to the highest level of safety performance, and thereby improve performance in all areas of its business”***

# Task Force on Safety and Service Excellence

- **Panel members**
  - Public safety
  - Traffic engineering
  - Professional drivers
  - Pedestrian/bicyclists groups
  - Private business

# Task Force on Safety and Service Excellence

- **19 Task force recommendations**
  - 200 separate tasks
  - All completed
- **Recommendation categories**
  - TriMet Culture
    - Make safety a value, not a priority
  - Communication and Engagement
    - Empower employees to be active participants

# Task Force on Safety and Service Excellence

- **Recommendation categories (cont'd)**
  - Accountability, Empowerment and Support
    - Elevate and expand Safety Department
    - Develop and implement comprehensive safety program
    - Enhance accountability for safety
  - Tools, systems and Process
    - Develop metrics
    - Use safety data for informed decision making

# Safety Culture

- The extent to which safety is emphasized, both formally and informally, by an organization and its members
- Safety culture impacts
  - Safety performance
  - Injury rates
  - Incident rates
  - Customer safety

# Safety Culture Study

- **Conducted by Washington State University**
  - Performed in 2012
- **Measured employee perception of**
  - Management's concern for safety
  - Safety communication
  - Safety training
  - Supervisory safety influences (enforcement and behaviors)
  - Knowledge, motivation, behaviors, attitudes

# Safety Culture Study

- **Three biggest factors employees said influenced employee safety**
  - Perception of safety as a value
  - Supervisor safety enforcement
  - Employee/supervisor communication

# Communication and Engagement

- **Revised TriMet mission statement to include safety as an integral component in providing transit services**
- **Safety as a value incorporated explicitly into job descriptions of all TriMet employees**

# Communication and Engagement

- **Held a series of safety workshops for Leadership team and all Directors and Managers**
  - Develop an understanding of safety as a value
  - Promote positive safety culture traits
  - Safety performance measures

# Communication and Engagement

- **Safety Exchanges**

- Quarterly informal sessions with Transportation employees to share safety suggestions and concerns

- **Request for Safety Assessments**

- Available to all employees
- Formal process for employees to call attention to safety issues and concerns
- Employees receive updates

# Communication and Engagement

- **Continuous Improvement Teams**
  - Bus operator (BOCIT)
    - Recipient of Governor's Safety Award
  - Route schedules
  - Operator restrooms
  - Slips/Trips/Falls
  - Rail operator rulebook
  - Rail right-of-way safety
  - Rail reliability

# Operational Safety Projects

- **Pedestrian Crossing Safety Upgrades**
  - Updated design criteria, including improved lighting
  - Additional audible/visual warning devices
  - Fencing for channelization
  - Swing gates/Bedstead barriers
- **Bus Pedestrian Safety**
  - Turn warning system
  - Mobile Eye – pedestrian detection system (under development)

# Operational Safety Projects

- **Right-of-Way Worker Safety Enhancement demonstration project**
  - Enhances protection of workers from trains
  - Under design
- **Positive Train Control (PTC)**
  - Monitor and control of train movements to enhance safety of Wes operations

# Hours of Service Policy

- **Fatigue**

- *A physical and/or mental state resulting resulting from prolonged physical and/or mental exertion or insufficient quantity and/or quality of sleep or rest in which an individual's motor skills, coordination, reasoning, and/or reaction are degraded . . .*

- **Assists in management of fatigue**
- **Increases rest period requirement**
- **Reduces work-load induced fatigue**
- **Prevents fatigue-related incidents**

# Operator Re-Certification

- Annual 8-hour instruction
- Designed to
  - Enhance operator defensive driving skills
  - Share safety risk information
  - Focus on prevention of slips, trips, and falls
  - Introduction to the Safety Management System

# Supervisor Certification

- Annual 8-hour instruction
- Designed to
  - Enhance Supervisor skills
  - Share safety risk information
  - Introduction to the Safety Management System

# Safety Risk Analysis

## Hazard and Vulnerability Analysis Process

### **HAZARD OR VULNERABILITY IDENTIFIED**

HAZARDS OR VULNERABILITY CAN BE IDENTIFIED BY ANY PROJECT MEMBER, INCLUDING CONTRACTORS AND SUBCONTRACTORS

### **HAZARD OR VULNERABILITY REPORTED**

HAZARDS AND VULNERABILITIES ARE REPORTED TO PROJECT SAFETY ORGANIZATION AND DOCUMENTED

### **HAZARD & VULNERABILITY ASSESSMENT MADE**

DETERMINE HAZARD AND VULNERABILITY CAUSES; ANALYZE SEVERITY AND PROBABILITY FACTORS; DETERMINE CORRECTIVE ACTIONS; COMMUNICATE TO PROJECT PERSONNEL

### **RESOLVE HAZARDS**

ASSUME RISK OR IMPLEMENT CORRECTIVE ACTION TO ELIMINATE OR CONTROL HAZARD OR VULNERABILITY; DOCUMENT ACTIONS TAKEN

### **FOLLOW-UP**

MONITOR CORRECTIVE ACTIONS FOR EFFECTIVENESS

# Hot Spot Reviews

- **Problem locations that require detailed analysis**
- **Identified through:**
  - Incident reports
  - Incident and collision data
  - Near miss reporting
  - Routine review of routes
- **Conducted by Safety staff**

# Strategic Data Sharing

- **Implemented Safety Management Information System (SMIS)**
- **Designed to gather key performance indicators**
- **Identify safety risks**
- **Monitor corrective actions and control measures**

### Bus Collisions per 100,000 Miles

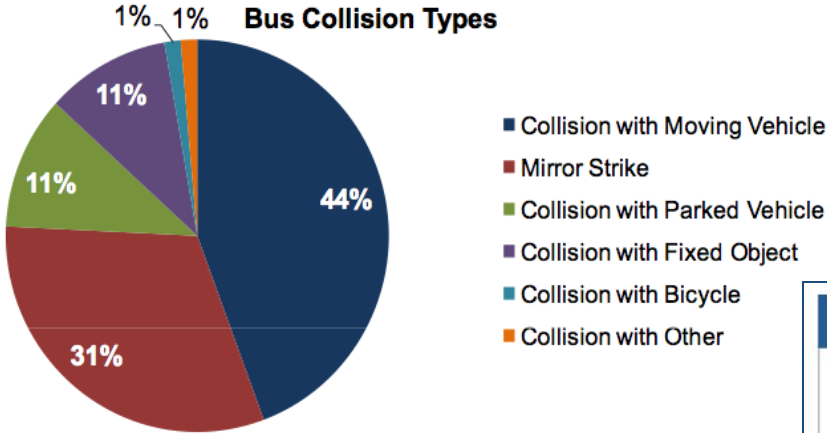

— Current 12 Months (2011-2010)    - - Prior 12 Months (2010-2009)

### MAX Collisions per 100,000 Miles

— Current 12 Months (2011-2010)    - - Prior 12 Months (2010-2009)

# Collision Data Analysis

| Collision Type                | Number     | Percent     |
|-------------------------------|------------|-------------|
| Collision with Moving Vehicle | 161        | 44%         |
| Mirror Strike                 | 114        | 31%         |
| Collision with Parked Vehicle | 40         | 11%         |
| Collision with Fixed Object   | 38         | 11%         |
| Collision with Bicycle        | 5          | 1%          |
| Collision with Other          | 5          | 1%          |
| <b>Total</b>                  | <b>363</b> | <b>100%</b> |

## 14-Hawthorne

N=25

- Moving Vehicle
- Mirror Strike
- Parked Vehicle
- Fixed Object
- Bicycle/Ped.
- Other

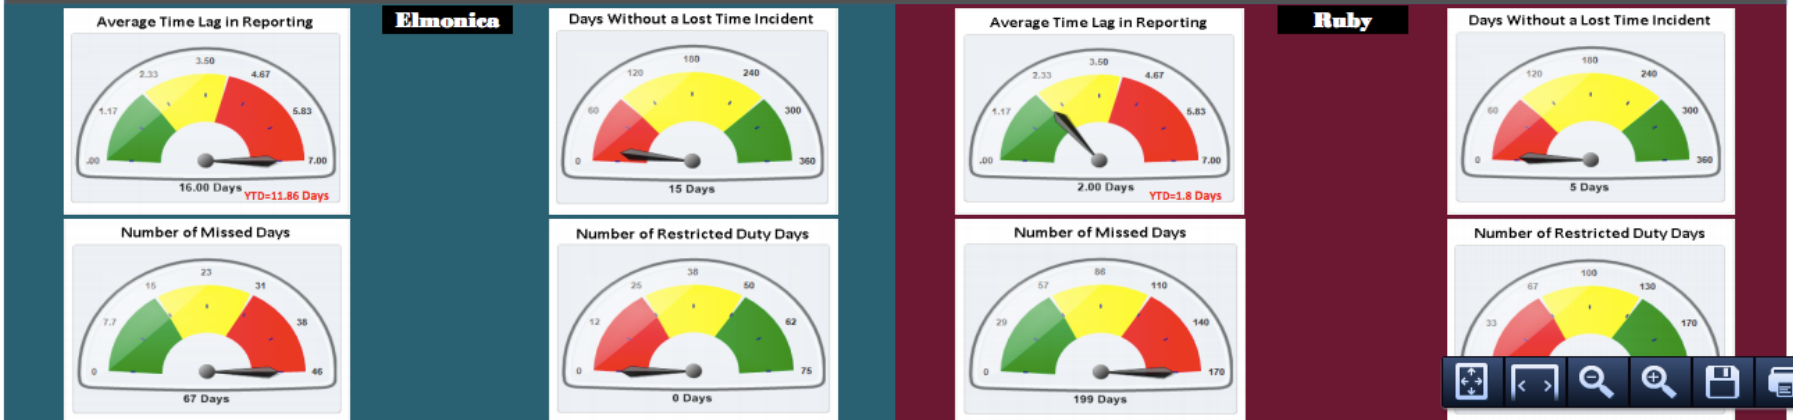

# Safety Dashboard

REM

SMIS Performance Metrics

3rd Quarter - 2015

# Safety Outreach

- Messages/safety prompts across the entire system everyday
- Targeted efforts via campaigns, advertising and events

# Safety Education Advisory Committee (SEAC)

- 8-member committee
- Collaborate to promote pedestrian and driving safety around buses and trains
- Meets quarterly

# Hot Spot Reviews

- **Field reviews to better understand source of potential hazards**
- **Performed by Safety staff in collaboration with Training, Operations and Service Planning**
- **Frequently carried out with support from partner jurisdictions**

# Safety Committees

- **Ambassadors to the workforce**
- **Committees established at all facilities, including administrative headquarters**
- **Safety Committee member training**
  - Problem solving
  - Meeting facilitation
  - Hazard identification and assessment
  - Safety Management System (SMS)

# Transit Change and Review Committee (TCRC)

- Comprised of all Operating and Engineering departments
- Review/approve policies, plans, procedures
- Incident investigation and review
- Review and evaluate safety risks
  - Incident trends
  - Formal risk analyses

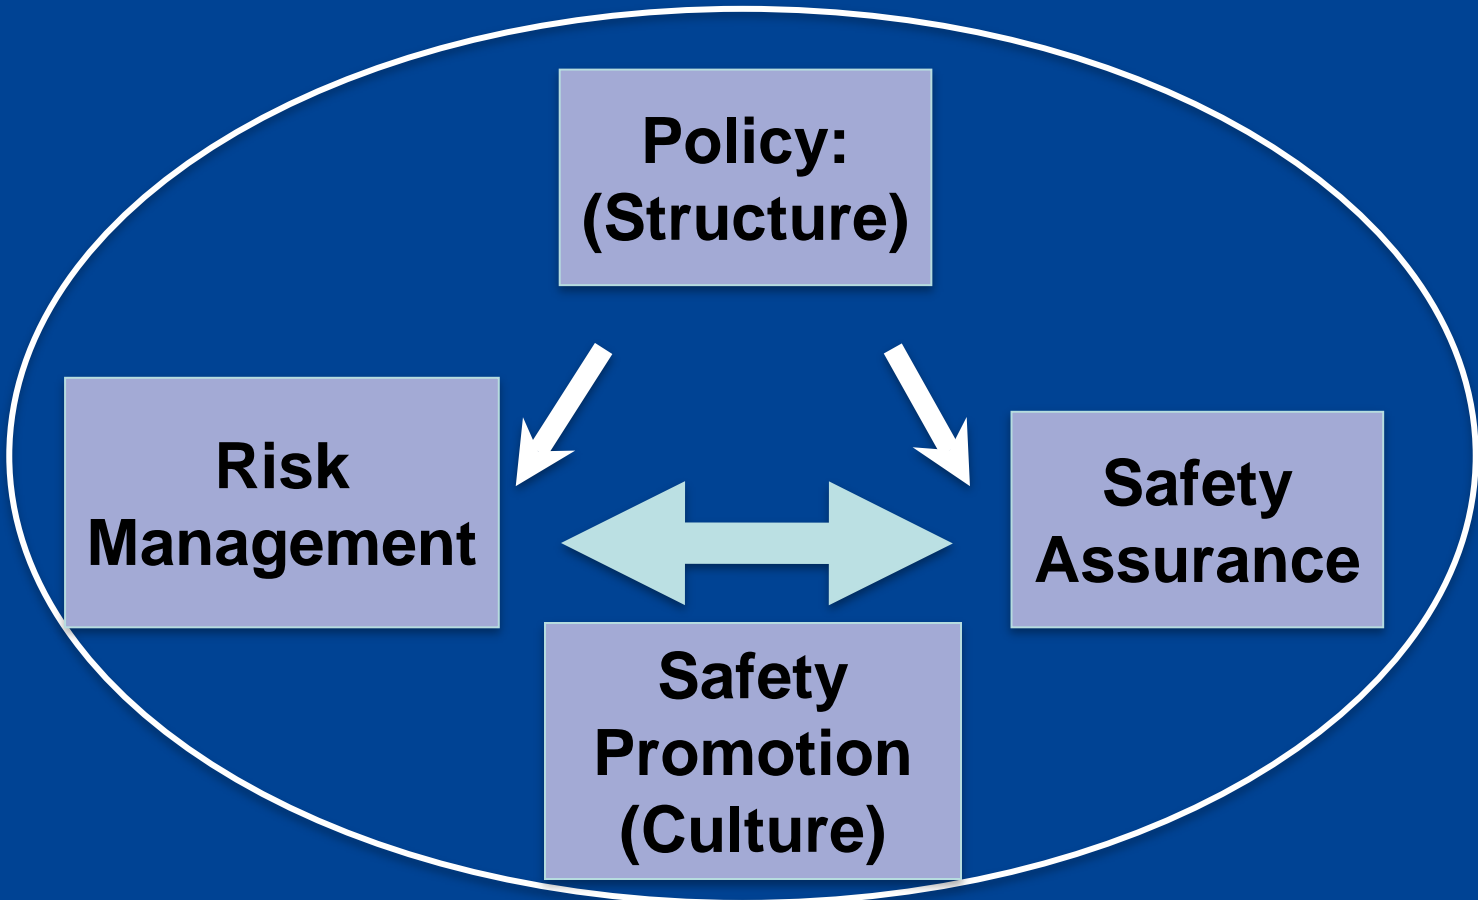

# Transition from Reactive to Proactive to Predictive Safety

# Safety Management System (SMS)

- Decision-making process fully integrated into TriMet's business and operations
- Requires self examination (how we do business)
- Safety risk analysis and assessment
- Safety risk information sharing
- Promotes continuous safety improvement
- Leads to enhanced safety culture

# Safety Management System

# Next Steps and Future Activities

- **Safety Management System development**
- **Improve safety communication**
- **Conduct Supervisor safety workshops**
- **Continue to build Safety Committee effectiveness**
- **Build upon safety metrics**
- **Develop close call reporting system**
- **Conduct Safety Culture Study**

***If you do what you've always done,  
you'll get what you always got!"***

***W. Edwards Deming***
